

AEH Legacy
Co-op Database

Membership Options

When your company joins our database, your membership level determines how you access our data.

Membership Levels

Tier 1 — View Items and If Stocked by Others

Tier 2 — Tier 1 + Request New Items

Tier 3 — Tier 2 + Export UPN Data

Member Status Options

New users also choose the status of their membership (*Tiers 2 and 3 are automatically Contributors*).

Contributor— Provides a one-time download of their items list to grow the database

Merchant— Can purchase and sell obsolete inventory through our online application

Contributors can borrow parts from other members to supplement long vendor lead-times.

Users with the Merchant status are able to set their own prices and purchase from each other.

Contributors

When a contributing member signs up, they provide a single spreadsheet containing their entire items list. We do not alter your existing inventory system and only require item number, description, manufacturer and model number. Contributors add tremendous value to our database and strengthen their entire industry by participating in voluntary UPN borrowing. When your vendors are not able to meet your upcoming deadlines, you can request an express shipment from another Co-op Database member. Our support team will try to find other members who can loan you that part and divert your vendor to their facility. Additionally, contributing members can request the addition of new UPNs to the database at any time.

Merchants

The Legacy Co-op Database is designed to help your company recover funds lost to over-spending or under utilization. Nearly all of our members have obsolete or slow-moving inventory in their warehouses.

Simply check a box next to each item you are interested in relieving from your books, and we will try to find other members who are interested in purchasing from you. Members are able to set their own prices and can purchase both used and brand new parts from each other. AEH Legacy facilitates all database purchases without you having to reveal your identity to potential buyers. Companies that wish to sell off large equipment (not UPN items) can do so in our Equipment Store at <https://aehlegacy.com/store>. Access to our online Equipment Store does not require a membership to the Legacy Co-op Database.

Privacy, Security and Shared Data

Regardless of tier or status, all memberships are linked to a single physical location (your company). Companies with more than one location are assigned a discounted membership and login for each facility. This means we require you to provide the mailing address of your warehouse or storeroom, as well as the basic contact information of your designated purchasing agent. We do not show other members your contact information and will only use your mailing address when you are relieving or purchasing inventory through our database. Upon sign up, Contributors provide a one-time download of their company's local items list. This includes information such as: item number, description, manufacturer and model number. We do not track your inventory levels in our database and only store which UPNs you stock and which ones you want to sell. Tier 3 members may be asked to provide the name of their local CMMS or ERP software so we can customize export templates to fit their needs. Your sensitive data is encrypted and stored on secure, private servers and we will never share or sell your data to any outside entity.

Our Mission

The Legacy Co-op Database is intended to be the universal repository of all part numbers in all industries. We believe that corporations can benefit more from co-operation rather than competition. By combining our efforts, we can ensure the success of both ourselves and our neighbors while simultaneously lowering the amount of unnecessary purchases. By reducing an entire industry's amount of new purchases, we can relieve the additional stress put on our vendors and allow for better lead-times for both ourselves and others.

Which Membership is Right for Me?

Membership Type	Access Level	View All Item Details	If Stocked by Others	General Inquiries	Request New UPNs	Export Data to CSV	Contributor Status	Merchant Status
Tier 1		✓	✓	✓				
Tier 2		✓	✓	✓	✓		Required	Optional
Tier 3		✓	✓	✓	✓	✓	Required	Optional

Tier 1

Our most basic level of member is only able to view our universal parts list without copying or exporting data. This type of membership is ideal for users who just need to locate basic manufacturer info for their inventory.

Tier 2

Mid-tier members can request the addition of new specific parts to the database. This type of membership requires you to be a one-time Contributor by sharing your parts list with AEH Legacy.

Tier 3

Top tier members enjoy all the benefits of lower tiers plus the premium feature of exporting our data. This type of membership is ideal for members who want to utilize our proprietary UPNs in their local ERP system.

Contributor Status

Tier 2 and tier 3 members are required to be Contributors. Contributors pay a one-time setup fee to initially convert their inventory items to UPNs and load their data into the Co-op Database.

Merchant Status

Merchant members can mark their overstocked items as for sale with a simple checkbox. AEH Legacy will mark this item as Available for Purchase for all other Co-op members and help facilitate any purchases.

Contributor Setup Fee

The initial data loading process is quoted separately from the standard monthly membership. Contributors must email their inventory data to liz@aelegacy.com to receive an official quote for their company to become a Contributor. The labor required to convert your data into UPNs depends on a variety of factors including your total number of items and how much manufacturer information you possess.

Monthly Membership Pricing

Corporations with multiple companies receive a reduced monthly rate for all memberships. Each company is considered a separate location and requires a separate membership and set of credentials. As an added bonus, members that upgrade from a Contributor to Merchant status receive an instant upgrade discount!

Membership	Single Location	Multiple Locations
Tier I View Only	\$500.00 USD	\$450.00 USD
Tier II Contributor	\$800.00 USD	\$720.00 USD
Tier II Merchant	\$1,000.00 USD	\$900.00 USD
Tier III Contributor	\$1,300.00 USD	\$1,170.00 USD
Tier III Merchant	\$1,500.00 USD	\$1,350.00 USD
